Summary

Software engineer with a foundation in computer programming and databases. I build full-stack web products, desktop tools and realtime applications, including AI integrations. My AI-native workflow combines Codex and Claude Code with architecture, typed contracts, code review and automated testing. UX, design systems and conversion optimization inform my engineering decisions.

Technical Skills

Technologies: TypeScript / JavaScript, React, Next.js, Node.js, Bun / Electron, PostgreSQL / SQL, Redis, Supabase, WebRTC / WebSocket / Socket.IO, Google Gemini API, Tailwind CSS, Git / GitHub, Playwright / Vitest, Codex / Claude Code, Figma, GA4 / Funnels.

Capabilities: Frontend Development, Backend Development, API Integration, Data Modeling, AI-assisted Development, AI API Integration, Realtime Applications, Test Automation, UX / UI Design, Design Systems, CRO / A/B Testing, Product Thinking.

Projects

Surfel: SaaS in development: Next.js/TypeScript monorepo, PostgreSQL data models, role-based access, APIs, webhooks and background jobs.

cxbilen.com: Live Next.js/TypeScript portfolio with reusable UI components, shared-source PDF/DOCX CV exports, component tests and browser checks.

Dev Migration Assistant: Released Electron/React desktop tool for Git working state and AI context migration; typed IPC, encrypted archives and checksum-verified restore.

PlayAgain: Browser gaming application with Next.js, WebRTC, WebSocket and Redis; phone controllers, QR room pairing and save-state APIs.

Looplift: Next.js/Supabase beta for AI-assisted conversion audits; versioned experiment patches, human approval, measurement guardrails and rollback.

Maestro: AI execution workspace with Next.js, Bun workers, PostgreSQL and Redis; typed job lifecycle, streamed output and artifact review.

SkyWise: Next.js/React travel-assistant case study with typed interaction flows, rule-based intents and simulated service integrations.

LENZ: Live virtual try-on product using Next.js, Supabase and Gemini image-generation APIs; merchant authentication, rate limits and usage tracking.

ZEDrift: Browser driving game with React/Three.js rendering, drift physics, Socket.IO multiplayer and PostgreSQL/Prisma account persistence.

Experience

Senior UX Engineer | Efsora Labs | Feb 2026 - Jul 2026 · Türkiye

Led UX engineering and design systems across SaaS and web flows. Translated product requirements into user journeys, prototypes and implementation specifications, and standardized a design system of 40+ components.

Senior CRO Executive | Digital House | Mar 2025 - Jan 2026 · Istanbul

Owned CRO and UX for web and e-commerce, turning funnel analysis into prioritized A/B tests that lifted conversion +12% and reduced checkout drop-off -16%.

UX/UI Designer | Eva | Sep 2023 - Aug 2024 · Izmir

Designed end-to-end SaaS interfaces and Figma prototypes, simplifying complex flows into clear workflows and improving task-success in usability tests by +20%.

Designer Project Manager | innoscripta AG | May 2023 - Jul 2023 · Berlin

UX/UI Designer | StudioMoco | Dec 2022 - May 2023 · Nuremberg

CRO Executive | Hype | Apr 2022 - Sep 2022 · Istanbul

Web Developer | İnce Fikirler | Mar 2019 - Feb 2020 · Izmir

Education

Associate's, Computer Programming | Izmir University of Economics | 2014 - 2016

Software development, web programming and database fundamentals.

Database Interactive Programming | Ç. Altan Anatolian Technical HS | 2010 - 2014
